## Stage 3 - Q&A with Dr. Karl

Event Date: Wednesday 23<sup>rd</sup> March 2022 (via Zoom)

Dear Parents/Caregivers,

On Wednesday 23<sup>rd</sup> March 2022 students in Stage 3 will participate in a Q&A session with Dr. Karl Kruszelnicki. Dr. Karl is a qualified scientist, doctor and engineer whose engaging approach to science has led him to become a well-known children's author, media personality and science communicator.

In Science and Technology this term, students are learning about the wonders of the universe. They are exploring scientific concepts relating to the solar system and developing their planetary knowledge. In conjunction with weekly science lessons, students are also engaging in inquiry-based STEAM projects focused on developing their design thinking and investigative skills. Presently, students are either creating a short-film about a galactic concept or constructing 3D prototype Mars rovers.

The Q&A session presents an opportunity for students to engage in scientific discussion with an expert, explore the wonders of the universe and hear firsthand how scientists make discoveries and solve real-world problems. In preparation for the event, students will work collaboratively to compose 15 questions to ask Dr Karl. The session will be held via Zoom and will run for approximately 45 minutes.

If you have any concerns about your child participating in this event, please contact your child's teacher. If you would like to withdraw your child from this learning activity, please contact Mrs Ptolemy directly via the school email.
